

Preschool (PS): Ages 3-5
School Age (SA): 1st-5th

Schedule: Monday-Friday 9:00 11:30

Cost: \$85 except cooking camps are \$95

June 11-15

Fairytale Physics (PS)
Lego Jr Builder (PS)
Cooking Around the World (SA)

June 18-22

Cars, Trucks, & Things That Go (PS)
Messy Art (PS)
Arts & Crafts (SA)

June 25-29

Princess (PS)
Super Hero Science (PS)
Soccer (SA)

July 9-13

Pirate Camp (PS)
Campout Cooking (PS)
Stop Motion Film Making (SA)

July 16-20

Let's Put on a Play (PS)
Construction Zone (PS)
Learning from the Masters (SA)
STEAM (SA)

July 23-27

Eric Carle's Creepy Crawlies (PS)
Singing, Swinging & Shaking (PS)
Lego (SA)

Camp Descriptions

PRESCHOOL—KINDERGARTEN CAMPS (PS)

Cars, Trucks and Things that Go

Race cars, build trains, launch rockets and more! Through play, experiments and stories, we'll discover the science behind cars, trucks and all the things that go.

Campout Cooking

Get out and explore the great outdoors & nature. Build a (pretend) fire and pitch a tent as you get ready to learn some cooking skills while camping. S'mores never tasted so good as you sing songs around the campfire.

Construction Zone: What can you build today? We will be using legos, blocks, Lincoln logs and crazy, giant blocks to use our math, problem solving and logic skills to make a new creation. Everyday is a new problem to solve.

Eric Carle's Creepy Crawlies

Explore Eric Carle's colorful world of hungry caterpillars, busy spiders, beautiful butterflies, and more! Campers will learn about the important roles bugs have in our world through crafts, stories, games and experiments, while exploring the nature around us.

Fairy Tale Physics

What did gravity have to do with Humpty Dumpty's fall? Did Rapunzel need to use her hair, or could she have used a pulley? Why was the big, bad wolf not able to blow down the house made of bricks? Explore the wonderful world of science with your favorite fairytales. Campers will bring some of our beloved tales to life with science, engineering, storytelling and imaginative play.

Lego Jr Builder: What can you build today? Each day, use your math, problem solving and logic skills to make a new creation. Cars, ninja's, cities, animals & more. Measure, weigh, create and explore. It's Lego's like you've never seen them. A new engineering adventure awaits you.

Let's Put on a Play

Calling all actors & designers... lets put on a play... The 3 Little Pigs. Children will learn acting skills, and set & costume design. At the end of the week, parents are invited to see the performance.

Messy Art

What better way to explore art then to get hands on and messy! From watercolors and pastels to splatter paint, you will use all types of mediums.

Pirate Camp

Ahoy, Mateys! Join our crew this summer and experience the science behind sinking a ship, hoisting a boat's sail, finding treasure, and more. Along the way we use imaginative play, hands on activities, and stories about the high seas to transform campers into pirates.

Princess Camp

A beautiful and fun dream world full of royal and wonderful activities like making wands, and crowns and acting like a princess. Who is your favorite? On the last day dress up and practice your good manners at our Princess Tea Party.

Singing, Swinging and Shaking

Children will enjoy singing songs, finger play games, moving to music and playing instruments. The songs will reinforce turn taking, basic music concepts while finger play games reinforce speech and linguistic goals of matching sound sequentially while having fun! Moving to music is designed to support gross motor movement in relation to music.

Superhero Science

Calling all superheroes. This is the camp for you! We are going to use the good of science to help us defeat the villains. We will learn about the forces at work in our universe and how simple machines give us super strength and speed. A villain has frozen our city in a block of ice, and we will use science to save it! When it comes to superheroes and superpowers anything can happen!

SCHOOL AGE 1ST-5TH CAMPS (SA)

Arts & Crafts

Bring out your creative side as you make all kinds of arts and crafts. Explore different mediums such as watercolors and pastels to taking different materials from recycled to tissue paper. Everyday will be a new creation that lets your artsy side shine.

Cooking Around the World

Come explore the world as you visit a new country everyday and learn about its culture, food and art. You will be cooking & eating a dish that is native to that country.

Learning from the Masters

Spend a week getting to know some of the world's greatest and creating you own masterpieces inspired by their work. We'll explore Picasso's use of color and shape, create sculptures inspired by Dale Chihuly, learn about Vincent Van Gogh as we create starry night globes, and more!

Lego Builder: What can you build today? Each day, use your math, problem solving and logic skills to make a new creation. Cars, ninja's, cities, animals & more. Measure, weigh, create and explore. It's Lego's like you've never seen them. A new engineering adventure awaits you.

Soccer

Come work on your soccer skills. Learn new techniques and have fun through games as you get some great exercise. This camp will include team building, leadership and problem solving so that campers have a super summer.

STEAM

Science, Technology, Engineering, Arts, Math... oh my! This is hands on, problem solving that features a different challenge everyday with some interesting materials. This camp brings ones of our best classes from our Maker's Space

Stop Motion Film

Become a movie writer, director and producer as you create your own mini movie through time lapse pictures. You can use Claymation, live action or cardboard cutouts to make your movie come to life.

Please pack a water bottle each day. NO SNACKS All Camp fees are non-refundable
